

## Interpret A Data Visualization Project

### Insight 1:

Statistical Analysis & Data Mining job skill has the most consistent ranking across the data set with 12 out of the 14 countries having a rank for this job skill that is within +/- 1 rank of the Global Average. From the dashboard I clicked on the Statistical Analysis & Data Mining field column and this showed that the Global Average rank is 2 and that all the countries except India and Singapore are within +/- 1 rank. India and Singapore have a rank of 5 (+3) and 4(+2), respectively.

### Insight 2:

Web Architecture & Development Framework has the highest ranking in Brazil when compared to the other 13 countries in the data. It is also the only country that ranks this skill higher than the Global Average. From the dashboard I clicked on the Web Architecture & Development Framework field column and this showed that Brazil ranks this job skill at #2. The Global Average is #3 and all other countries in the data rank this job skill as a #3 or greater.

### Insight 3:

User Interface Design has the highest ranking in India when compared to the other 13 countries in the data. It is also the only country that ranks this skill higher than the Global Average. From the dashboard I clicked on the User Interface Design field column and this showed that India ranks this job skill at #2. The Global Average is #5 and all other countries in the data rank this job skill as a #5 or greater.
